

Scatter Tube

Instructions for use

PETRIBUTES
for memories to cherish

1

Remove outer lid and separate the inner & outer tube.

2

Place the inner tube firmly in a flat surface & slowly fill with cremains, using a funnel if necessary.

3

Run a generous line of glue around the inside of the outer tube about 2.5cm or 1 inch from the top edge.

4

Line up the openings of both tubes & push outer tube slowly downwards to allow air to gently escape through the vent hole.

5

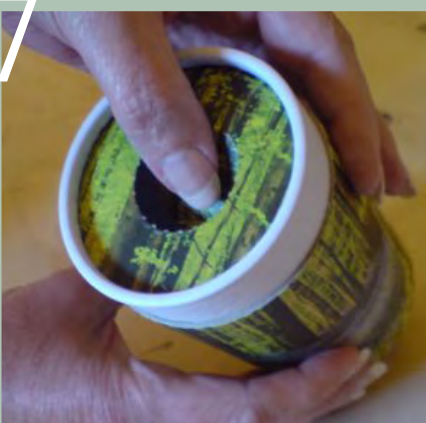

Once the tubes are firmly in place, attach the sticker provided over the vent hole before returning the tube to its upright position.

6

Turn the sealed tube over and place the outer lid on, ensuring that any pattern is neatly aligned

7

To scatter the ashes, remove the outer lid and push out the perforated disc.

Keepsake Size

PLEASE NOTE:

The keepsake (4in³) size does not have an inner lid and perforation. Simply remove the lid and discard the silica gel pack before filling or scattering ashes.
